

BRONCO

UDD BLAST WHEEL

BUILT TO BLAST

As an industry innovator, Bronco pioneered the first direct drive blast wheel that improved cleaning and reduced cycle time, setting the standard for power, durability, and ease of use. Today, the Bronco UDD Blast Wheel's enhanced heavy-duty design delivers unmatched value with increased productivity, extended wear life, and simplified operations, and is built tough enough to earn the Bronco name.

Available in 13UDD, 16UDD, and 16UDD-XL wheel assemblies

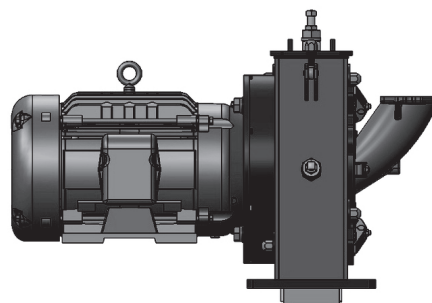

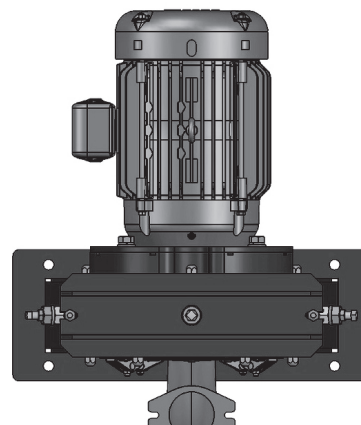

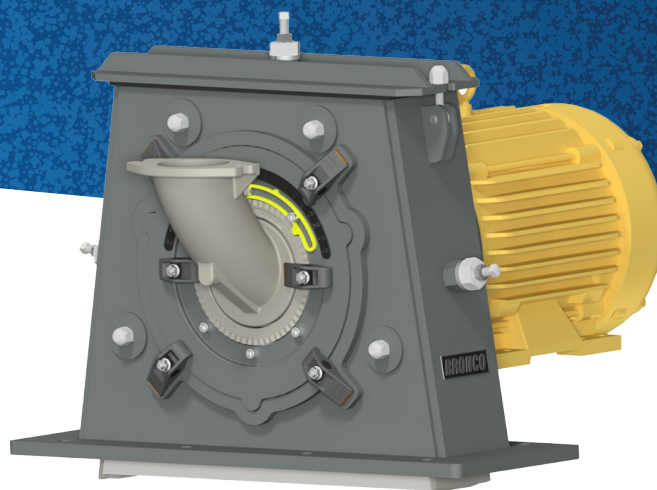

Designed and Assembled in the USA

Heavy-Duty Features

- 1/2" manganese housing
- Replaceable, long life cast liners
- Long blade, impeller, and control cage life
- 7.5 - 75 HP motor available
- C-Face motor mount reduces overhung shaft loads for longer motor life
- No springs, blade blocks, or pins

Assembly and Service

- Stepped wheel hub sets internal spacing for fast assembly
- Target lock ensures blast pattern alignment after service
- Retaining fasteners with replaceable threaded bushings protect against shot lock
